Management

GOOD KNOWLEDGE

UX & UI Design

SEO

ABOUT ME

My motto - "Be better than yesterday in everything you do."
I'm excited about tech, more specifically the following: Web Development, Game Development, UX & UI (precisely understanding human behavior).
I firmly believe that whatever you do, it is important to leave your mark in a positive way and bring value wherever you are.

EXPERIENCE

PHP Developer April 2021 - Present
PITECHPLUS - Oradea, ROMANIA

- Interventions on existing projects, corrective and evolutionary maintenance
- Writing and testing the piece of code needed for the implementation of a new feature on the existing project
- Constantly developing my skills by keeping in touch with the latest technologies

Technical Support Engineer April 2019 - April 2021
IKOULA (Hosting Provider) - Reims, FRANCE

- By creating small pieces of JavaScript scripts, I increased the efficiency of the support team's workflow
- Main role in maintaining 40 different servers with over 12,000 clients. The daily activities were, troubleshooting CMS platforms (Wordpress, Magento, Prestashop), migrating Databases and web files, configuring mail services and answering to the tickets of the customers
- I was part of the training crew who took care of our new colleagues, explaining and showing them the main tasks of a sysadmin / support technician

Web Developer (Internship) January 2019 - March 2019
Monstock (Startup) - Bezannes, FRANCE

- Worked with the UX / UI design team to improve the website, increasing the conversion rates by 15%
- Implementation of new functionalities of the website which were pushed live on the production after testing

LANGUAGES

-  ROMANIAN (Native)
-  ENGLISH (Advanced)
-  FRENCH (Advanced)

Year of completion: 2020

PHP Certification
- UDEMY -
Year of completion: 2022

SKILLS

- HTML / CSS / JavaScript / PHP
- Sass / Bootstrap / jQuery
- Symfony / React
- Node.js / Webpack / Babel
- MYSQL / MongoDB
- Git / Github / GitLab
- Wordpress / SEO
- Figma / Affinity Designer

MY PROJECTS

CMS Platform (HTML/ CSS/ JavaScript/ PHP)

- Platform created in my free time with the aim of deepening my knowledge about OOP programming and security against MYSQL injections
- 🔗 [Visit project](https://github.com/JohnCornea/cms-blog) -> <https://github.com/JohnCornea/cms-blog>

Github Profile Finder (React / Redux / Github API)

- Application where you can search and find the Github profile of any developer. The API allows detailed view of the profile of ex. (number of repositories, number of followers, etc.)
- 🔗 [Visit project](https://githubfinder1016.netlify.app/) -> <https://githubfinder1016.netlify.app/>

Palette Color Generator (HTML / CSS/ JavaScript)

- I've created a color generator app that allows the user to save his favourite palette. The palette will be saved in the browser's local storage.
- 🔗 [Visit project](https://palette-color-generator.netlify.app/) -> <https://palette-color-generator.netlify.app/>
