ABOUT ME

My motto: 'Be better than yesterday in everything you do.'
Passionate PHP developer with +4 years of experience creating, maintaining, and optimizing scalable web applications.
Driven by a strong belief in adding value through impactful solutions and committed to continuous growth and excellence in development.

EXPERIENCE

PHP Developer
CONCENTRIX - Cluj, ROMANIA
📅 April 2021 - December 2024

- I single-handedly managed a project after completing my training, delivering new implementations on time while communicating directly with the client.

- Maintained scalable Drupal apps, handling backend logic (PHP, Drupal, JavaScript).

- Debugged and resolved critical application errors.

- Writing and testing the piece of code needed for the implementation of a new feature on the existing project.

Technical Support Engineer
IKOULA (Hosting Provider) - Reims, FRANCE
📅 April 2019 - April 2021

- By creating small pieces of JavaScript scripts, I increased the efficiency of the support team's workflow.

- Main role in maintaining 40 different servers with over 12,000 clients.
  The daily activities were, troubleshooting CMS platforms (Wordpress, Magento, Prestashop), migrating Databases and web files, configuring mailing services.

- I was responsible in training the new comers and showing them different procedures. Also, I was supervising them for few days.

Web Developer (Internship)
Monstock (Startup) - Bezannes, FRANCE
📅 January 2019 - March 2019

- Worked with the UX / UI design team to improve the layout of the website, increasing the conversion rates.

- Implementation of new functionalities for the website
